

Don't Get Caught "FLAT" With a Flat Spare Tire!

73% of drivers do not check the tire pressure in their spare.

Out of 29.5 million service calls last year, AAA reported that 4 million or 13.2% were tire related.

REMEMBER

- Full-Size Spare — Rotate your full size spare in accordance with your vehicle manufacturer's recommendations
- "Donut" Spare — This is a TEMPORARY tire that should be used only to get to a tire shop to replace your damaged tire. These tires typically have mileage and speed restrictions.
- Check your tire pressure every month and don't forget that spare.

To request additional information or schedule an interview, contact Dan Zielinski, RMA, (202) 682-4846.
